

# La Waide Cie

" Les frères Bricolo "

Technical rider

**Standalone version - without technician**

Update April 2019

---

This technical rider describes the ideal conditions for hosting the show.  
Do not hesitate to contact Frédéric OBRY if your reception conditions are different.  
We will find together solutions in order for the show to run smoothly.

---

## Stage

Optimum dimensions: 6 m wide and 5 m deep

Minimum dimensions: 5 m wide by 4 m deep

The floor should be perfectly smooth (parquet, painted concrete, linoleum) and preferably black. If it is not smooth, it will imperatively be covered with black dance floor.

A black backdrop is welcome. The darkness is desired.

## Power supply

You will provide European standard sockets

A 230V / 16A socket, acting area upstage

A 230V / 16A socket, behind the spectators.

## Technical

The show is autonomous in sound and light equipment.

The show is played without technician.

## Monting / Dismantling

The place of installation must be cleared upon the team's arrival.

Set up: 2 hours.

Disassembly: 1 hour 30.

Duration of the show : 40 minutes.

## Audience

If the stage is on same level as the audience you must create tiers. At least 3 heights of different seating.

For example: floor mat, then small benches/chairs, then chairs.

## Gauge

80 persons

## Hospitality

Thanks for providing hot and cold drinks, dried fruits and towels.
